EXPERIENCE.

GHOne TV, Accra — Graphic Designer

July 2021 - August 2021

Worked in the creative department for 2 months. Developed templates that were used to broadcast news, sports highlights and more. Also designed the backdrop currently being used for the Rythmz Covers show.

easyGo, Remote — UI Designer

December 2022 - January 2023

As a UI Designer for the company, I focused primarily on designing a web app to create and manage trips.. My role involved close collaboration with the development team to ensure the designs were implemented accurately and effectively..

Scynett, Remote — UI Designer

January 2023

As a UI Designer for the company, I designed a comprehensive dashboard interface and reworked the UI and interactivity of several mobile apps.

Freelance — Graphic Designer

Since 2019

Working as a freelance Graphic designer for multiple businesses both locally and internationally.. Building brands and designing visuals that help promote the brand.

Construct Virtual — Freelance Designer

Since 2021

As a freelance designer for Construct Virtual, a UK-based company specializing in marketing solutions for construction firms, I work directly with clients to create tailored designs. My role involves designing logos, social media posts, brochures, banners, and other marketing materials, ensuring each piece aligns with the client's brand and industry standards.

Reppblue, Remote — UI Designer/Developer

August 2023

In my role, I work on UI projects for the company, developing user interfaces from initial wireframing through to final prototyping. I

Secondary School,
Legon**

September 2016 - May 2019

collaborate with cross-functional teams to ensure design consistency, conduct usability testing to refine user experiences, and implement feedback to enhance the overall functionality and aesthetic appeal of our digital products.

PROJECTS

UI / UX —

Dryce - Designed the UI for the Dryce laundry app.

Bitsy - Designed the UI and prototyping for Bitsy, a student app that manages all classes, documents, portals etc that a student needs access to.

Trackwise - Also worked on the UI and Prototyping of this project. My final year project. The NFC attendance tracking app.

Portfolio Website —

Developed my first website with WordPress, which is a graphic design portfolio. Also built a ticketing website that cinemas could use to sell tickets to customers using html, css and js.

Developed a new Portfolio site with ReactJs. The portfolio is available at collinss.me

Mobile App Development —

Developed a cross platform music application with a colleague with React Native and Django. Worked on all Frontend parts of the project.

Developed a mobile app ui in react native for footwear. The app allows users to purchase any type of footwear.

For a school project, we developed a laundry service application called Dryce. The app is currently available on the Google Play store.

I have also worked on two applications for a client with other colleagues..

Trackwise - This project was an NFC based attendance tracking app. The app is mainly for tertiary institutions to track attendance of students for various classes.

Graphic Design — Freelance

Currently running a graphic design business since 2019 till date. I work as a freelance designer in Ghana and remotely..I use design tools such as Figma, Photoshop, Illustrator, Premiere Pro, After Effects, Indesign and others.
